Working Paper No. 2011-02

Social Economy and Sustainability (SES/ÉSD) Research Network

Bibliography: Project Outputs

Prepared by
Melissa Russwurm, Communications Assistant (2010-11)
SES/ÉSD Research Network
June 2011
About the production:
Melissa Russwurm worked as communications assistant for the SES/ÉSD Research Network in 2010-2011. She is a 2012 Master of Public Relations candidate at Mount Saint Vincent University (MSVU). She holds a Bachelor of Arts in Journalism and Communications from St. Thomas University. Melissa prepared this bibliography under the direction of Network Coordinator Noreen Millar and Network Director Dr. Leslie Brown.

About the Network
The Social Economy and Sustainability Research (SES/ESD) Network is the Atlantic Node of the Canadian Social Economy Research Partnerships (CSERP) — one of six regional research centres across Canada, funded by the Social Sciences and Humanities Research Council of Canada (SSHRC), 2005-2010. The Network has a wide variety of academic, community and government partners representing Nova Scotia, New Brunswick, Prince Edward Island and Newfoundland and Labrador.

www.msvu.ca/socialeconomyatlantic/ For more information, contact us: Social Economy and Sustainability Research Network, Mount Saint Vincent University, Halifax, Nova Scotia B3M 2J6.
Tel: 902-457-6748
Fax: 902-457-5547
E-mail: seproject@msvu.ca

About CSERP
The Canadian Social Economy Research Partnerships (CSERP) is a collaborative effort of six regional research centres (nodes) across Canada, their community partners, and the national facilitating research hub. CSERP reaches out to practitioners, to researchers and to civil society, through the regional research centres and their community partners. It undertakes research as needed in order to understand and promote the social economy tradition within Canada and as a subject of academic enquiry within universities.
www.socialeconomyhub.ca

About this bibliography
The SES/ESD Network created this bibliography to provide interested parties with the full range of digital and print outputs of the network. The bibliography outlines research publications and contributions, including products, events and activities up to May 31, 2011. For more information about this bibliography, please see the introduction on page 4.

* Sub-node 2, 3 and 4 relate to community mobilization and the social economy.
Introduction

The SES/ÉSD Network created this bibliography to document our research in Atlantic Canada and to provide interested parties with the full range of digital and print outputs of the network. The bibliography outlines research publications and contributions, including products, events and activities up to May 31, 2011. The 65 projects in our network were conducted by academics and social economy practitioners. Additional products are anticipated over the next year.

The bibliography is organized by research themes and sub-node research clusters. The SES/ÉSD Network hopes the research will contribute to the theory and practice of social economy within the Atlantic Region. Also included in each submission is: project number, type of submission and intended audience.

Each sub-node differed in number of people, projects, goals and research questions, among other things. For full dissemination efforts of each sub-node, you can visit our website at: http://www.msvu.ca/socialeconomyatlantic/English/projectsE.asp.

For easy access to outputs from our team members and community partners, you can also visit our digital commons site: the Social Economy Space at www.socialeconomyatlantic.ca. Please contact the author for more information on outputs listed below that cannot be found online.
Sub-node 1 - Mapping & Policy Analysis

Sub-node 1 had two main areas of research. Firstly, SN1 captured a portrait of the social economy of the Atlantic region, in as many of its facets as possible. The portrait showed: needs addressed by the social economy; distinctive or innovative qualities; the degree of interconnectedness among its facets, the implications of these connections and; the characteristics of social economy organizations in the region. This theme is generally referred to as "mapping".

The second main area of research within SN1 was "policy" - investigation of questions of government policy regarding the social economy. Among others, these questions included: how different understandings of the social economy are reflected in government policy; what needs are unmet; what changes are needed in the regulatory environment and; what indicators can be developed to aid in policy development.

Sub-node 2, 3 and 4 relate to community mobilization and the social economy

Sub-node 2 - Mobilization Around Issues of Empowerment & Inclusion

Sub-node 2 looked at issues of inclusion and empowerment in the social economy. For this area of research, University of Prince Edward Island (UPEI) faculty collaborated with PEI community organizations. The research was done by faculty members in the following departments: Island Studies, History, Anthropology, Nursing, Psychology and Philosophy. The faculty joined forces with community partners who work to advance the well-being of low income people, single mothers, seniors, aboriginal people and others who tend to be marginalized in society.

Sub-node 3 - Mobilization Around Issues of Food Security

Sub-node 3 focused on issues of food security. Food security is the ability of individuals to obtain sufficient, nutritious, personally acceptable food through normal food channels. The research carried out in this sub-node was deeply rooted in Participatory Action Research (PAR). Team members collaborated to develop specific research questions and to effect positive change in the partner organizations and their communities. A variety of methodologies were used, through which partners took action, made changes, developed learning tools and explored strategies for public engagement.

Sub-node 5 - Measuring & Financing the Social Economy

Sub-node 5 looked into the financial structures of the social economy and asked the following questions: What can social accounting, co-operative accounting, social auditing and other techniques contribute towards a better understanding of the work and contributions of social economy organizations? Where do social economy organizations obtain the financing that they need? How can social economy organizations attract financing? What do social economy organizations contribute towards financing the social economy?

Sub-node 6 - Communication Practices & Tools

Communication, both internal and external, plays a significant role in the success or failure of a social economy venture. The primary research of SN6 investigated how to connect and encourage exchange and transfer of knowledge within the social economy sector. SN6 looked at issues such as: how social economy actors can best communicate; technology as an equalizer vs. technology as a barrier and; what our team can contribute by developing and modeling communication processes and technique.

SES/ESD Network Research Goals

- Contributing to the theory and practice of social economy in the Atlantic region
- Internal bridging, bonding, mentoring & capacity building
- Encouraging use of the “social economy” as a framing concept in the region
- Linking Atlantic partners with other parts of Canada and the world

SES/ESD Network Research Themes and Questions

**Conceptualizing & describing the social economy in Atlantic Canada**
- What does the social economy look like? What needs does it address?
- How can we best capture this sector conceptually?
- What, if anything, makes it distinctive or innovative? How interconnected are its facets, & to what effect?
- What are the characteristics of social economy organizations?
- What are the implications for government policy?

**Policy inventory and analysis**
- How are different understandings of “social economy” reflected in government policy?
- What needs are not being met, & what changes are needed in regulatory environment?
- What indicators can we develop to aid in policy development?

**Community mobilization around issues of common concern (natural resources; food security; inclusion and empowerment)**
- Do social economy organizations contribute to social inclusion, the democratization of the economy, & empowerment?
- What inputs are needed to overcome obstacles & build capacity?
- What can we learn from research on mobilization around food security, empowerment & inclusion, community management of natural resources & energy?

**Measuring and Financing the Social Economy**
- What can social accounting, co-operative accounting, social auditing, & other techniques contribute towards a better understanding of the work and contributions of social economy organizations?
- Where do social economy organizations obtain the financing that they need?
- What do social economy organizations contribute toward financing the social economy?

**Modeling & researching innovative, traditional, & IT-based communication and dissemination processes**
- How can social economy actors best communicate?
- What can our Network team members contribute by developing & modeling processes and techniques?
- What can be gained from exploring technology as an equalizer vs. technology as a barrier?
**Network Director:**
Dr. Leslie Brown, Professor, Sociology/Anthropology, Mount Saint Vincent University
