An Exploration of Froebel's Gift #14 leads to Monolinear, Re-entrant, Dichromic Mono-Polyomino Weavings
An Exploration of Froebel’s Gift #14 leads to Monolinear, Re-entrant, Dichromatic Mono-Polyomino Weavings
by Eva Knoll and Wendy Landry
Froebel's Gifts
Friedrich Wilhelm August Fröbel (1782 – 1852) is credited for the invention of Kindergarten, which has set the standard for early schooling for a long time.

He designed a series of "Gifts" for children to play with that would provide them with important learning experiences.

Gift # 14 is the gift of weaving.
Strand Direction
Polyomino
Monohedral Tessellation
Dichromic Tessellation
